1. A customer purchased an IBM SVC solution from a Business Partner. In physical installation processes, which action can be the last step to complete?

- A. provide power, LAN, and SAN connectivity
- B. complete the customer training for SVC administrators
- C. upgrade host, SAN, and disk server code to SVC supported levels
- D. conduct a pre-install Solution Assurance Review (SAR) with Business Partner, IBM, and customer

Answer: B

2. What should be considered when designing an IBM SVC solution for a customer who needs disaster recovery?

- A. number of HBAs and distance between sites
- B. number of HBAs and copy services software
- C. distance between sites and copy services software
- D. distance between sites and 10Gb Ethernet connections

Answer: C

3. How many FlashCopy targets per source are supported in SVC 4.2.1?

- A. 2
- B. 8
- C. 16
- D. 32

Answer: C

4. What happens if an MDisk is deleted from an MDisk Group (MDG) using the `rmmdisk -force` command? What happens if an MDisk is deleted from an MDisk Group (MDG) using the `rmmdisk -force` command?

- A. Any extents on the MDisk are deleted along with the MDisk.
- B. An error message is displayed that indicates an MDisk that contains extents cannot be deleted.
- C. Any extents on the MDisk are migrated off the MDisk (to other MDisks in the MDG) prior to its deletion.
- D. If there are any extents on the MDisk, the option is provided to migrate them to other MDisks before they are deleted.

Answer: C

5. If more than one error occurs during an operation, which SVC system error code is displayed on the front panel?

- A. the latest detected error

- B.the error with the lowest priority
- C.the error with the highest priority
- D.No error code is displayed. The "Check Log" is shown.

Answer: C

6. Which error notification settings are valid?

- A.All, Critical Only, and None
- B.All, Hardware Only, and None
- C.Complete, Informational, and None
- D.All, Hardware Only, and Software Only

Answer: B

7. Which statement is true about the latest software for the SVC?

- A.You must order the software from IBM.
- B.It can be found on the SVC Master Console.
- C.Software is automatically downloaded to the SVC.
- D.It can be found on the website <http://www.ibm.com/storage/support/2145>.

Answer: D

8. Which platform is NOT supported by IBM SVC?

- A.Windows
- B.HP-UX 10
- C.VMWare ESX
- D.Red Hat Linux Enterprise Server

Answer: B

9. A customer has implemented an IBM SVC solution.
Which migration option is available to the customer?

- A.migrate an image mode VDisk to a smaller VDisk
- B.migrate two VDisks to one VDisk with an appropriate extent size
- C.migrate a VDisk to multiple VDisks with appropriate extent sizes
- D.migrate a VDisk from disk subsystem A to subsystem B with appropriate extent sizes

Answer: D

10. What is a best practice when implementing IBM SVC?

- A.The cluster should be in the same UPS power domain.
- B.The switches should be cascaded to become one fabric.
- C.The hosts and SVC nodes should be configured in one zone.
- D.The storage device and SVC nodes should be configured in one zone.

Answer: D
