

Exam : IBM 190-848

**Title : IBM Lotus Notes Domino 8:
Building the Infrastructure**

Update : Demo

1.Thomas has moved the container for the DB2 database group titled HRApp7 to a new disk volume on the Unix server. Which of the following steps must be performed in Domino for users to maintain access to the DB2 data store?

- A.The users must remove and re-add the databases to their bookmarks
- B.The administrator must update all the view indexes of the DB2 containers
- C.The reconciliation tool must be run to update any links in the DB2 containers
- D.The new containers must be enabled for transaction logging and the new logs completed before users can access the container

Correct:C

2.What is the name of the shared resource that lets you define a DB2 view of Notes data?

- A.DB2 Access view (DAV)
- B.Notes Access view (NAV)
- C.Lotus Access View (LAV)
- D.Domino Object view (DOV)

Correct:A

3.The Domino administrator has locked a DB2 group. He then manually deletes five DB2 enabled databases from the Domino server in that group. Which of the following statements is true in this scenario?

- A.He may now add five databases to the group.
- B.The group may not have more databases added.
- C.He must compact the Domino server to defragment the DB2 group.
- D.He may now add five databases to the group if their total size does not exceed the size of databases removed.

Correct:B

4.What are the two types of DDM Web probes?

- A.Uptime and Failure
- B.Logging and Failure
- C.Performance and Enabled
- D.Best Practices and Configuration

Correct:D

5.You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A.Pager
- B.Broadcast
- C.Run an Agent
- D.Log to Database

Correct:C

6.Due to space considerations on her Domino server, Anissa has had to locate new databases under a folder not in the Domino data directory. Instead she has placed them on the F drive. Which one of the following should Anissa use to make these databases accessible to the users?

- A.Database Link
- B.Directory Link
- C.Profile Document

D.File Protection Document

Correct:B

7.A DDM application probe performs which of the following?

- A.Checks Web settings
- B.Probes agent schedules
- C.Checks server replication
- D.Probes database operations

Correct:B

8.You have noticed that the mail-in database that stores server diagnostic information is growing large. It is possible to limit messages for automatic diagnostic data collection by adjusting what setting?

- A.Diagnostic file patterns
- B.Maximum size of diagnostic message including attachments (in MB)
- C.Minimum size of collection message including attachments (in MB)
- D.The name of the mail-in database used for receiving automatic diagnostic data

Correct:B

9.Which of the following ports uses the server document for binding while the rest require entries in the notes.ini file?

- A.ICM
- B.HTTP
- C.SMTP
- D.LDAP

Correct:B

10.Latrice set up domain searching. Which one of the following is referenced when a domain search is made?

- A.Domain Catalog
- B.Database Catalog
- C.Domino Directory
- D.Directory Assistance

Correct:A

11.Directory assistance in Lotus Domino 8 enables you to specify when a secondary directory must only be used for authentication. This provides which of the following features?

- A.This blocks email from being forwarded to adjacent domains.
- B.This avoids NAMELookups to reduce the number of ambiguous Name dialog boxes.
- C.This help you validate your choice of host name for receiving authentication requests.
- D.This scans group member lists to ensure that each member exists in an available directory that is configured in directory assistance.

Correct:B

12.Each time David restarts the agent manager, certain agents that should only run once are running unscheduled. Which of the following steps may he perform to alleviate the issue while still allowing the agents to run as required?

- A.Set the agents to run on server restart only.
- B.Remove the server name from the agent security tab.

-
- C.Set the agent manager not to start by removing it from the notes.ini server tasks line.
D.Make copies of the necessary agents into a new database and move that database out of the data directory until necessary.

Correct:A

13.A special type of application probe for DDM always runs and requires no configuration. Which of the following are monitored by this probe?

- A.Agent security rights
B.Disabled agents for the compact task
C.Agents that terminate abnormally when the maximum time to run is exceeded
D.SQL query operations performed on databases that are not full-text indexed

Correct:C

14.Domino Domain Monitoring (DDM) enhanced events contains which of the following?

- A.Specific target information only
B.Events generated by an event probe only
C.Events generated by an event generator only
D.All of the above

Correct:D

15.You have elected to create a marker so clients can update their reference to a database called MARKETING.NSF. You did not select a designated destination server. Which of the following is the result of this action?

- A.The client will remove the bookmark reference for the database.
B.The client will search all servers in the domain for a replica of the database and modify the bookmark.
C.The client will search all known cluster servers only for a replica of the database and modify the bookmark.
D.The client will prompt the user to specify servers to search for a replica of the database and modify the bookmark.

Correct:A

16.Which task in a Domino cluster checks for availability of other servers in the cluster?

- A.Cluster Manager
B.Cluster Updater
C.Cluster Operator
D.Cluster Load Balancer

Correct:A

17.If the Fault Analyzer task locates duplicate fault reports, what is the next step the task will take?

- A.The new crash is reported as a response to the original crash
B.The new crash is not reported due to it matching a previous fault reported
C.The new crash is reported as a new document but a doclink is created to the original
D.The new crash is reported as a new document and no reference to matching documents can be created

Correct:A

18.Jose set up Web authentication using primary and secondary directories. Which one of the following describes the order in which he set up directories to be searched?

- A.Domino primary directory, then Domino secondary directories. This is the only option available.
B.Domino primary directory, then either Domino or LDAP secondary directories. The administrator can

specify the order of secondary searches.

C.LDAP primary directory, then LDAP secondary directory, and then Domino secondary directories. This is the order in which secondary searches must be made.

D.Domino primary directory, then Domino secondary directory, and then LDAP secondary directories. This is the order in which secondary searches must be made.

Correct:B

19.Mike, the Domino administrator, has configured Rooms and Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

A.The user's home server

B.The resource's home server

C.The first cluster server available

D.The server closest to the physical location of the resource

Correct:B

20.The collected probe results in a DDM Collection Hierarchy database are replicated when which of the following occurs?

A.A collection server initiates a push replication with a spoke server.

B.A collection server is notified about the change in an event state on a monitored server.

C.A collection server receives the console command 'probe xxx' where xxx is a remote server.

D.A collection server obtains a SMTP message in the ddm.nsf database notifying it to pull new events.

Correct:B

21.Satchel, the Domino administrator, is attempting to implement design note compression on the resource database. He is unable to see the property selection to enable this feature. Which of the following is preventing him from seeing this selection in the database properties box?

A.He is not manager of the database.

B.He has not deferred index creation.

C.He has not enabled the new Domino 8 ODS.

D.He does not have the designer client installed on his workstation.

Correct:C

22.Billy wishes to use compression on his Domino servers for client connectivity. What steps must Billy do to make this function?

A.Enable binding on the client port; restart the client; disable tunneling on the server port; restart the server port

B.Disable binding on the client port; restart the client; enable encryption on the server port; restart the server port

C.Enable compression on the server port; restart the server port; enable compression on the client port; restart the client

D.Disable encryption on the server port; restart the server port; enable tunneling on the server port; restart the server port

Correct:C

23.A condensed Directory Catalog is defined as which of the following?

A.A primary directory that is created by default upon the first Domino server installation

B.An optional directory that aggregates user and group entries from one or more Domino Directories

C.A required database that contains all of the databases on the server that is updated nightly through a default server task

D.A database that performs a nightly task of removing duplicate person and group entries by comparing the primary and all secondary directories that are configured

Correct:B

24.The Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

A.setup.exe -silent -options c:\temp\install.txt

B.nsetup.exe -silent -options c:\temp\install.txt

C.setup.exe -response -options c:\temp\install.txt

D.silent.exe -response -options c:\temp\install.txt

Correct:A

25.Which of the following type of permanent failure response is sent when you enable the Domino server to reject ambiguous names through directory lookups against the primary Domino directory?

A.Mailbox unavailable

B.The recipient is unknown

C.The mail server is unavailable

D.The recipient is rejected for policy reasons

Correct:D

26.By default, the TNEF Converter does not process which of the following messages at the server?

A.S/MIME signed

B.Return receipts

C.Ambiguous names in email

D.Delivery status notifications

Correct:A

27.Murphy, the Domino administrator, has added a new domain to the Global Domain document. The new domain is not being seen even after he instructed the Router to reload it's configuration. Which of the following is the most likely cause of this?

A.The notes.ini on the Domino server must include the line 'ReloadGlobalFromCommand=1'

B.The Router must be given the command 'Tell Router Update Global' at the server console

C.The LDAP task must be shut down and restarted in addition for the new Global Domain to be seen by Domino

D.The Router does not check the Global Domain document for changes in response to the update configuration command

Correct:D

28>Your Domino 8 inbound SMTP receives numerous connections that are unsuccessful in completion. Most of the connections are generating SMTP error codes. Which of the following solutions did they implement to assist in reducing these connections?

A.Enabled the rejection of ambiguous names

B.Modified the SMTP server to not check the senders domain

C.Implemented an error limit before the connection is closed

D.Enabled a delayed delivery report to the originator of the message

Correct:C

29.Users are utilizing mail rules to forward messages to other devices. However,many of these messages are being blocked by spam filters due to a lack of sending server information to prevent delivery status reports. Which of the following may be utilized to provide valid sending server information?

A.Verify sender DNS

B.Pre-delivery agents

C.Reverse path settings

D.Allow authenticated hosts

Correct:C

30.In order to specify connecting hosts to be excluded from blacklist checks, which filter should be utilized?

A.Pubic spam lists

B.Private blacklists

C.Private whitelists

D.Public allow lists

Correct:C
