1. What are the two occasions when it is appropriate to run "Compile APPS schema" by using the AD Administration utility in the Oracle Applications R12 E-Business Suite environment? (Choose two.)

- A. during the Oracle Applications R12 E-Business Suite upgrade process
- B. when custom packages are moved to the APPS schema and need to be compiled
- C. after enabling the multiple reporting currencies in the Oracle Applications R12 E-Business Suite environment
- D. after enabling the multiorganization functionality in the Oracle Applications R12 E-Business Suite environment
- E. when encountering invalid objects in the SYS and SYSTEM schemas in the Oracle Applications R12 E-Business Suite database

Answer: AB

2. What are the two possible sequences of worker status while a job is being completed by a worker? (Choose two.)

- A. Waiting => Assigned => Running => Completed
- B. Assigned => Waiting => Running => Completed
- C. Waiting => Assigned => Running => Failed => Fixed, Restart => Restarted => Completed
- D. Assigned => Waiting => Running => Failed => Fixed, Restart => Restarted => Completed
- E. Waiting => Assigned => Running => Failed => Fixed, Restart => Restarted => Running => Completed

Answer: AC

3. Identify the files that are changed when you run AutoConfig. (Choose all that apply.)

- A. /listener.ora
- B. /.env
- C. /admin/adconfig.txt
- D. /.env
- E. /appl/admin/.xml

Answer: ABD

4. Identify the patch that you apply to upgrade the Oracle Applications system from the 11.5.5 version to the 11.5.10 version.

- A. diagnostic patch
- B. stand-alone patch
- C. maintenance pack

D.product family release update pack

Answer: C

5. You want to apply a patch on your Oracle Applications system. Before doing this, you want to view the files that are new, changed, and ignored while applying the patch.

Which feature of the Patch Wizard would help you accomplish this?

A.Patch Filters

B.Patch Impact Analysis

C.Recommended Patches

D.Patch Information Bundle

Answer: B

6. Which table is used by AutoPatch as a staging area for the job information in parallel mode and needs to be dropped to start a new autopatch session if the earlier session failed?

A.FND_JOBS

B.FND_PROCESSES

C.FND_INSTALL_PROCESSES

D.FND_INSTALLED_PROCESSES

Answer: C

7. If the patch is running in Pre-Install mode, where would the patch history files be stored in Oracle Applications R12 configured on a UNIX operating system?

A.\$AD_TOP/admin

B.\$APPL_TOP/admin

C.\$TEMP/runInstaller

D.\$APPL_TOP/admin/

E.\$COMMON_TOP/admin/

Answer: D

8. As part of the cloning process, the Applications DBA needs to copy the application tier file system to the target system.

Which step is NOT a part of this process?

- A. Shut down the application tier server processes.
- B. Log on to the target system application tier nodes as the oracle user.
- C. Copy the APPL_TOP directory from the source node to the target node.
- D. Copy the directory from the source node to the target node.
- E. Copy the directory from the source node to the target node.
- F. Copy the directory from the source node to the target node.
- G. Copy the <ORACLE_HOME> directory from the source node to the target node.

Answer: B

9. While working with Web forms an application user sometimes comes across a performance issue. The initial screen takes too long to appear with the Web form screen, showing the status "Downloading JAR files..." for a long time.

Identify the reasons for this. (Choose two.)

- A. It always takes time to load the Web forms.
- B. An older version of Sun J2SE plug-in is installed on the Desktop tier.
- C. JAR files for the Forms client applet are downloaded automatically the first time it is used.
- D. The browser will automatically retrieve new JAR files if they have changed on the application tier.
- E. The Internet Explorer browser security level should be set as "Low" for the zone that contains the Oracle Application Release 12 Web pages.

Answer: CD

10. After the successful installation of Oracle Applications Release 12, environment files are created.

Which environment file is used to identify and describe third-party and custom applications linked with Oracle Applications?

- A. the context file
- B. the devenv.env file
- C. the fndenv.env file
- D. the adovars.env file
- E. the adconfig.txt file

Answer: B

11. What is the default value of ?

- A.APPS_
- B.APPS_
- C._
- D._
- E.APPS_

Answer: D

12. During installation, the Rapid Install process creates _____ that are used to start and stop the server processes on the database tier.

- A.JServer load balancers
- B.cost-based optimizers
- C.database resource managers
- D.session-persistent load balancers
- E.database-tier server process scripts

Answer: E

13. Which command can be used only with a single-node installation?

- A.rapidwiz -restart
- B.rapidwiz -techstack
- C.rapidwiz -servername
- D.rapidwiz -silent -config

Answer: C

14. You experience report-error problems in the Inventory module after applying a patch to the same module.

You run the AD Administration utility, and select the Generate Application Files menu. Because you have report problems, you decide to run Generate Report Files.

You answered the following questions during the utility run:

1. Do you want to generate Oracle report objects using the current character set? (You answer Yes.)
2. Do you want to regenerate the Oracle reports PL/SQL library files? (You answer No.)

3. Do you want to regenerate Oracle reports executable files? (You answer Yes.)

4. For which products do you want to generate Oracle report objects? (You answer "all reports in INV.")

After you run the AD utilities, most reports in Inventory run with no errors. However, you still experience errors with two reports.

Which two statements explain why the two reports still run with errors? (Choose two.)

- A. You have reports in a different language.
- B. You have reports with external library files.
- C. You have custom reports in a custom directory.
- D. You have reports from a different module being referenced on the Inventory report menu.

Answer: B

15. You just brought the middle tier back after a hardware problem has been fixed. Oracle Applications now experience problems with an entire product group of forms (fnd), which includes the sign-on form. You decide that you will generate the forms files in AD Administration to see whether this will fix the problem.

You answered the prompts from the utility as follows:

- 1. Do you want to generate Oracle Forms using your current character set? (Yes)
- 2. Do you want to regenerate Oracle Forms PL/SQL library files? (Yes)
- 3. Do you want to regenerate Oracle Forms executable files? (Yes)
- 4. Do you want to regenerate Oracle Forms menu files? (Yes)
- 5. Enter the list of products, or enter 'all' [all]: (fnd)
- 6. Do you want to generate specific form objects for each selected product? (Yes)
- 7. Enter libraries and menus to generate, or enter 'all' [all]: (APPCORE.pll, the main library)
- 8. Enter forms to generate, or enter 'all' [all]: FNDSCSGN.fmx

The utility finished with no errors in the log file.

What is the outcome of running the adadmin utility?

- A. All forms in the product group fnd now render with errors.
- B. All forms in the product group fnd now render without errors.
- C. All forms but one in the product group fnd now render with errors.
- D. All forms but one in the product group fnd now render without errors.

Answer: C
