1. In B-Series virtual fabrics, which feature allows you to access devices in another virtual fabric?

- A: Inter-VSAN Routing
- B: Inter-Fabric Routing
- C: Cross-VSAN Routing
- D: Cross-Fabric Routing

Correct Answers: B

2. How can you improve iSCSI host performance in a SAN?

- A: Upgrade to CommandView 7.
- B: Use NICs with TOE (TCP/IP Offload Engine).
- C: Enable NPIV (N_Port ID Virtualization) support.
- D: Disable SLP (Service Location Protocol) Service Agent.

Correct Answers: B

3. Which tool helps you design a SAN that includes HP Blade servers?

- A: SANsurfer
- B: SAN Visibility
- C: SAN Designer
- D: Blade Designer

Correct Answers: C

4. Which SAN switch management tool, previously only available as an embedded version, is now separately available on CD?

- A: Emulex EZpilot
- B: McData HAFM
- C: Cisco Fabric Manager
- D: Brocade Fabric Watch

Correct Answers: C

5. What are benefits of logical fabrics? (Select three.)

- A: port count reduction
- B: easier administration
- C: fabric service isolation
- D: increased performance
- E: fault propagation minimization
- F: device sharing across logical fabrics

Correct Answers: C, E, F

6. Which tool would you use to quickly survey a SAN environment?

- A: HP SAN Surveyor
- B: HP SAN Designer
- C: HP CommandView
- D: HP SAN Visibility Tool

Correct Answers: D

7. Brocade Secure Fabric OS is running on a fabric with four switches. If you are logged in to one of the switches and change the Admin password, which switch or switches will have the password changed?

- A: all the switches
- B: LDAP-enabled switches only
- C: only the switch you are logged in to
- D: only switches connected to the Ethernet

Correct Answers: A

8. Under ideal operating conditions, what is the maximum supported, long-wave transceiver distance with B or C-Series Switches and 4Gb SFPs?

- A: 4km
- B: 10km
- C: 35km
- D: 100km

Correct Answers: B

9. Which password authentication service can be used on Brocade switches in addition to the local switch database?

- A: NIS
- B: LDAP
- C: RADIUS
- D: Kerberos

Correct Answers: C

10. Where do you find the essential security elements in B-Series Fibre Channel switches running firmware v5.3.x?

- A: base Fabric OS
- B: Secure Fabric OS
- C: ISL Trunking manager
- D: switch port web interface

Correct Answers: A

11. A customer decides on HP c-Class BladeSystem as a corporate standard for servers. You must implement SAN integration of the blades into a very large fabric. The customer is concerned about the maximum switch count. Which interconnects will you recommend? (Select two.)

- A: QLogic 4Gb Fabric Switch
- B: Cisco MDS 9124e Fabric Switch
- C: Emulex 4Gb Advanced SAN Switch
- D: HP 4Gb Virtual Connect Fibre Channel Module
- E: Brocade 4Gb SAN Switch in Access Gateway mode

Correct Answers: D, E

12. A customer wants to replicate data between two sites 200 km apart. Which HP SAN product would you recommend?

- A: MPX 100
- B: MPX 110
- C: MPR 100
- D: MPR 110

Correct Answers: B

13. What is an advantage of iSCSI when compared to Fibre Channel?

- A: less protocol overhead
- B: no additional customer knowledge required
- C: easily provisioned through HP Storage Essentials SRM
- D: existing Ethernet infrastructure can be used to create a SAN

Correct Answers: D

14. Which SAN services are provided by the HP StorageWorks 400 Multi-Protocol Router (MPR)? (Select two.)

- A: ISL zoning
- B: FCIP tunneling
- C: IP-IP subnet routing
- D: iSCSI-FC translation
- E: FC-FC subnet routing

Correct Answers: B, E

15. John, your customer, has a SAN built on B-Series switches. He calls you because he heard about a new feature which allows him to distribute administrator responsibilities among his staff. After research, what is your recommendation to John?

- A: Upgrade to Secure Fabric OS version 5.2.
- B: Purchase the Advanced Administration license.
- C: Implement Distributed Administration through Fabric Manager.
- D: Implement Admin Domains available since Fabric OS version 5.2.

Correct Answers: D

16. A customer is expanding a SAN to 400 switch ports, but has limited rack space. Which single Director switch model is recommended?

- A: Cisco MDS 9509 Director
- B: Cisco MDS 9513 Director
- C: HP StorageWorks 4/500 SAN Director
- D: HP StorageWorks 4/256 SAN Director

Correct Answers: B

17. You are merging two fabrics and receive a fabric segmentation error that indicates the definition of a zone object in one fabric is different from its definition in the other fabric. What can cause this error?

- A: duplicate IDs
- B: zone type mismatch
- C: zone content mismatch
- D: zone configuration mismatch

Correct Answers: C

18. Which application can be used to set up network shares and provision iSCSI storage?

- A: Brocade Fabric Manager
- B: HP Data Protector Express
- C: HP CommandView EVA 7.0
- D: HP All-in-One Storage Manager

Correct Answers: D

19. Which zoning enforcement types do Fibre Channel switches provide to protect against unauthorized access? (Select two.)

- A: access authorization
- B: port-zoning authentication
- C: RADIUS server authentication
- D: directory access authorization
- E: soft-plus zoning by login authentication

Correct Answers: A, E

20. How many drives can be held by the M6412 drive shelf?

- A: 8
- B: 12
- C: 14
- D: 16

Correct Answers: B

21. Click the Task button.

Match the individual responsible for servicing each EVA4400 component.

Instructions:
Match the individual responsible for servicing each EVA4400 component. Each box may be used more than once.

Category	Description
(place here)	blower
(place here)	EVA controller
(place here)	disk drives
(place here)	power supplies
(place here)	firmware update
(place here)	installation

HP/Partner Service/Support Org Customer Consulting and Integration

Drag and drop question. Drag the items to the proper locations.

Correct Answers:

Instructions:
Match the individual responsible for servicing each EVA4400 component. Each box may be used more than once.

Category	Description
Customer	blower
Customer	EVA controller
Customer	disk drives
Customer	power supplies
Customer	firmware update
Customer	installation

HP/Partner Service/Support Org Customer Consulting and Integration

22. Which components must be replaced by HP authorized service personnel on the HP StorageWorks EVA x100 series? (Select two.)

- A: EMU
- B: blower
- C: I/O Module
- D: power supply
- E: hard disk drives

Correct Answers: A, C

23. You recently upgraded to CommandView EVA v7 and changed the password to pa\$\$word01. You can no longer manage the EVA5000. What is a possible cause?

- A: The password contains more than 8 characters.
- B: The password contains unsupported characters.
- C: The password contains fewer than 12 characters.
- D: The password requires at least one uppercase character.

Correct Answers: A

24. What is the minimum EVA base configuration? (Select three.)

- A: EVA4100 - 2C2D
- B: EVA4100 - 2C1D
- C: EVA6100 - 2C4D
- D: EVA6100 - 2C1D
- E: EVA8100 - 2C8D
- F: EVA8100 - 2C2D

Correct Answers: B, C, F

25. How many host ports are on an EVA4400?

A: 1

B: 2

C: 4

D: 8

Correct Answers: C
