

Exam : Microsoft MB4-212

Title : Solomon 6.0
Installation&Configuration

Update : Demo

1.What program do you use to set up SQL back up jobs?

- A.SQL Profiler
- B.Solomon Database Maintenance
- C.Enterprise Manager
- D.Service Manager

Correct:C

2.You wish to deploy Solomon in an environment with 34 concurrent users. Which Solomon edition needs to be installed?

- A.Single-User Solomon Standard Edition
- B.Multi-User Solomon Standard Edition
- C.Solomon Enterprise Edition
- D.Solomon Professional

Correct:D

3.Solomon's access security functions include which of the following?

- A.Controlling who can and cannot log into Solomon.
- B.Enabling and disabling Microsoft Access database security functions.
- C.Identifying Solomon database users and groups.
- D.Controlling who does and does not have access rights to certain Solomon windows.

Correct:A C D

4.Which of the following are key elements of the computer system inventory you should conduct before installing Solomon?

- A.Document network interface card (NIC) data
- B.Verify available RAM meets recommendations
- C.Verify available hard drive space
- D.Verify you have a backup keyboard

Correct:A B C

5.Which of the following cannot be installed from the Solomon CD(s)?

- A.Seagate Crystal Reports
- B.Solomon Tools for Visual Basic
- C.Microsoft SQL Server
- D.Solomon Kernel (SWIM)

Correct:C

6.Good implementation policies recommend a "pre-installation" process. Which of the following should be included in a pre-installation process?

- A.You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Solomon.

- C.Verify adequate hardware and software resources to run Solomon.
- D.Obtain the tools and resources used before, during and after the installation of Solomon program files.

Correct:B C D

7.Which Microsoft versions of Windows are supported for a Solomon client installation?

- A.Windows 95
- B.Windows 2003

-
- C.Windows XP
 - D.Windows 2000

Correct: B C D

8.What resources does the Solomon Kernel, Swimapi.dll, interface with?

- A.Customization Manager module
- B.Application modules and report writers
- C.Microsoft SQL Server
- D.Internet Explorer

Correct: A B C

9.When consulting with a customer in regard to needed hard disk space for Solomon databases, which of the following responses would you choose?

- A.A typical system and application database together will not require more than 100 MBs
- B.A typical system and application database together will require a minimum of 1 GB required
- C.A typical system and application database together need anywhere from 30 GBs to several hundred GBs
- D.A typical system and application database together need anywhere from 300 MBs to several GBs

Correct: D

10.Which of the following can increase a Solomon Application database's hard disk storage requirements?

- A.The volume of transactions processed
- B.The Solomon modules being used
- C.Transaction detail retention settings
- D.Installation of application help files

Correct: A B C

11.Which of the following could cause problems with a Solomon installation?

- A.Conflicting .dlls
- B.Inadequate RAM
- C.Using a USB keyboard and mouse
- D.Out of date Windows and SQL Server service packs

Correct: A B D

12.When installing SQL Server to be used with Solomon, you must do which of the following?

- A.Install with the default character set.
- B.Install it on the same server as Solomon.
- C.Set the sa user's password to "Master".
- D.Install with the default sort order

Correct: A D

13.Which of the following statements about referential integrity is true?

- A.Referential integrity is programmed into Solomon application windows.
- B.Referential integrity is solely the responsibility of the Solomon System Manager module.
- C.Solomon's referential integrity functions are closely connected to the referential integrity functions provided by Microsoft SQL Server.
- D.You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Solomon.

Correct:A

14. When analyzing a company for Standard Edition vs. Professional Edition for Solomon, what profiles would be most suitable for Standard Edition?

- A. Use Flexkey capability to segment the Inventory ID
- B. 15 users using Solomon six to eight hours/day
- C. 10 or less users
- D. Need Multi-company processing

Correct:A C

15. What Solomon module must be installed and set up for Business Portal to be able to process reports correctly?

- A. General Ledger
- B. Accounts Payable
- C. Accounts Receivable
- D. Application Server

Correct:D

16. Which of the following could cause problems with a Solomon installation?

- A. Conflicting .dlls
- B. Inadequate RAM
- C. Using a USB keyboard and mouse
- D. Out of date Windows and SQL Server service packs

Correct:A B D

17. Where does Solomon store the databases that a workstation last logged into?

- A. Windows Registry
- B. PVRec.csv
- C. Sollnst.cfg
- D. Solomon.ini

Correct:A B D

18. Which option should you select when installing Crystal Reports for use with Solomon?

- A. Local Install (Typical)
- B. Partial Local Install (Custom)
- C. Network Install
- D. Partial Network Install

Correct:A

19. How many times can you access Solomon while it is in TrialLoc mode before the system will require registration keys to continue using the product?

- A. 25
- B. 20
- C. 10
- D. 5

Correct:B

20. What backup scheme would be the most efficient for a company that has a high transaction volume that is concerned with the amount of data that could be lost?

- A. A full backup nightly.

-
- B.A full backup weekly and transaction log backups throughout the day.
 - C.A full backup weekly, a differential backup nightly and transaction log backups throughout the day.
 - D.A full backup weekly and transaction log backups nightly.

Correct:C

21.Which standard Solomon application provides the ability to customize a standard Solomon report, such as the General Ledger Trial Balance?

- A.Solomon tools for Visual Basic
- B.Solomon Customization Manager
- C.FRx
- D.Crystal Reports

Correct:D

22.Which of the following statements about Solomon databases is true?

- A.You can set up a System database and begin defining Solomon non-financial data without setting up Application databases.
- B.If you will be using multiple Application databases, Solomon requires you to identify all Application databases before beginning regular Solomon operations.
- C.You need to set up the System database and at least one Application database before beginning regular Solomon operations.
- D.You create the Solomon System database before you sign onto Solomon and then create the Application databases after you sign onto Solomon.

Correct:C

23.What back up scheme would be best for a company that has a lower transaction volume that is concerned with a fast recovery?

- A.A full backup weekly and transaction log backups throughout the day.
- B.A full backup weekly, a differential backup nightly and transaction log backups throughout the day.
- C.A full backup weekly.
- D.A full backup each night.

Correct:D

24.Steve has Insert rights to the Journal Transaction screen in Solomon. The Managers group has Update rights to the Journal Transaction screen in Solomon. Steve is a member of the Managers group. Which of the following is true?

- A.Steve will have Insert rights because individual user rights override group rights.
- B.Steve will have Update rights because group rights override individual rights.
- C.Steve will have no rights, because the rights conflict.
- D.Steve is not allowed to be in a group because he has individually assigned rights.

Correct:A

25.Which of the following statements about FRx installation are false?

- A.FRx program files must be installed on each client workstation.
- B.Universal Naming Convention (UNC) is not supported.
- C.The FRx program icons must be installed in a program folder under the Solomon program folder.
- D.During installation, you can install either the Professional or Desktop editions of FRx.

Correct:A B C

26.What screen resolution is recommended for on-screen display of Solomon windows?

-
- A.640 x 480
 - B.800 x 600
 - C.1024 x 768
 - D.1280 x 1024

Correct:C

27.Which of the following is listed in the correct order from lowest to highest of system security levels?

- A.Solomon security, Network security, Microsoft SQL Server security
- B.Network security, Solomon security, Microsoft SQL Server security
- C.Network Security, Microsoft SQL Server security, Solomon security
- D.There is no "order"; all security functions are at the same level

Correct:C

28.After installing Solomon, how do you implement SQL Server database security?

- A.Define database security using the administrative tools SQL Server provides for establishing the logical security layer
- B.Log into Solomon and apply a password in the Database Administration screen
- C.Select Set SQL Server security from the NT Administrative Tools, Administrative Wizard
- D.Changing the Solomon SYSADMIN password activates SQL security

Correct:B

29.Which of the following are true statements about Solomon product registration?

- A.Solomon must be registered immediately after you install the programs and set up your first System-Application database.
- B.If the company name on the registration screen is changed, the current unlocking keys will no longer be valid.
- C.Registering Solomon does not erase or alter any of the financial data stored in a database prior to registration.
- D.If Solomon is not registered within 20 database accesses, Solomon automatically makes the database inaccessible.

Correct:B C D

30.When you start the Solomon Setup program, which action does Setup perform automatically?

- A.Shut down any other currently running Windows applications
- B.Determine whether or not the server needs a newer version of OLE
- C.Detect whether or not Microsoft SQL Server is installed and prompt you to install it if it is not
- D.Open the Welcome window on first-time installations; open the Select Solomon

Correct:B
